**Personalize
Your Home**

**COMPATIBLE WITH
Amazon Alexa**

Trane® Home is compatible with some voice-activated devices.

WE CARE ABOUT YOUR PRIVACY

Homeowners can only share their system's data when they manually choose to.

Compatible with Trane Home

This smart thermostat brings integrated smart home comfort to your fingertips, allowing you to remotely control your home and energy use with the Trane Home App. It's easily accessible from a smartphone, tablet or computer, which makes adjusting the temperature for your family's comfort a breeze.

LEARNS YOUR PREFERENCES.

Advanced adaptive thermostat technology takes care of balancing comfort and efficiency.

LOWERS ENERGY BILLS.

Switching on Energy Savings enables energy efficiency optimization which can result in up to 10-20% HVAC energy savings.³

CONTROL FROM ANYWHERE.

Flexibility to automate, monitor, or control climate settings remotely with the Trane Home mobile app.

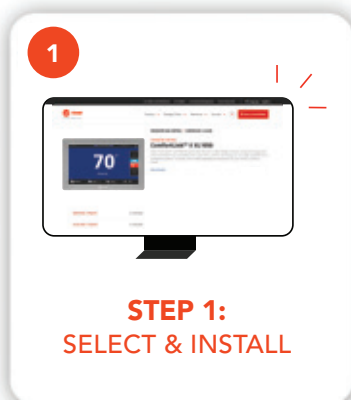

¹Requires internet service and connection to Trane Home.

²Adding smart home devices to your system may require a monthly subscription. Ask your dealer for details.

WIRELESS ROOM SENSORS

Adding wireless temperature and humidity sensors is a great way to take advantage of connected controls and to enhance comfort.

Sensors pair with the thermostat's built in bridge and can be placed in rooms where you want to be sure the climate is just right!

Dealer Remote Access allows you to grant limited access to your connected control so that your HVAC dealer or technician can access it remotely. With your permission, they can then view, edit and adjust your settings if necessary. This offers you the convenience and flexibility to **avoid any unnecessary service appointments.**
